
The shoulders and upper part of statues 2 are under the floor. It is quite clear that the statues had ~~already~~ been thrown out before the floor was made and the buildings to which the floor belongs (a confirmation of the later date assigned to those later buildings).

The king (Ka-Ra) is already known from inscription found by Lepsius (see Burgsch Bruiset p. 129). (Ra-Men-Ka). His father (Ra-Men) is also known from the Hungrolo Stela with the queen [illegible] (Rational)

The relation bet. (Ka-Ra) and (Ra-Men) is not. Hence arises a larger clearing made over the floor S and W before excavating further under the floor.
