Temple 500

Small trench (b) showed the floor with a ^{thin} white layer under a ^{thin} mud layer. Then ~~down to~~ at wet dirty sand and at 80 to 100 cm down another mud floor.

At small trench (c) there was already a break in the floor. The trench was sent across this break and came on a ^{black} one life size granite figure (standing, left foot forward, hands at side). ~~The~~ fragment Head, left shoulder and arm are broken off. On the back, a line of incised hieroglyphics: (as one). Underneath statue 1 and nearly a right angles lies a second similar statue (2).
