

Monday
April 10

Day of rest for men.

Dunham to Barkal to work on object register. I started for Nuri with Said but had to stop at the G.R. [?] shops for repairs. The screw was loose and the shaft packing was leaking. Finally reached Nuri shore at 12:30, Pyr. at 1.

We removed the bronze basin without difficult[y] but found the saniah stuck to the ground. As it is very fragile, and already broken in a number of pieces, we had to leave it until tomorrow.

Tuesday
April 11
68th day.

Work on (1) 800 pylon (2) 1000 (3) 506-520. (4) Nuri.

- (1) Clearing top and front of first pylon of 800.
- (2) Continued work on 1000. Frag. of blue glaze with dec. gold band.
- (3) Clearing rooms 506-520 as yesterday.
