to stone covered.

The protrusions of the subak heaps are clearly very late (Christian).

The back wall of the town crosses a ravine or water course which runs down from the desert. To relieve the pressure of water on the town wall, a trench ⑤ has been cut in the sandstone to carry the water around the ~~the~~ downstream part.

In the Turkish wall are several inscribed stones (copies by Breasted) - relief like Pp. reliefs; inscriptions like Tadmor Temple inscriptions.

Afterwards went to Kegebi where above the quarries, there is a curious
