

(April 5)
63

lintelings 800 and 800 sub has
been found.

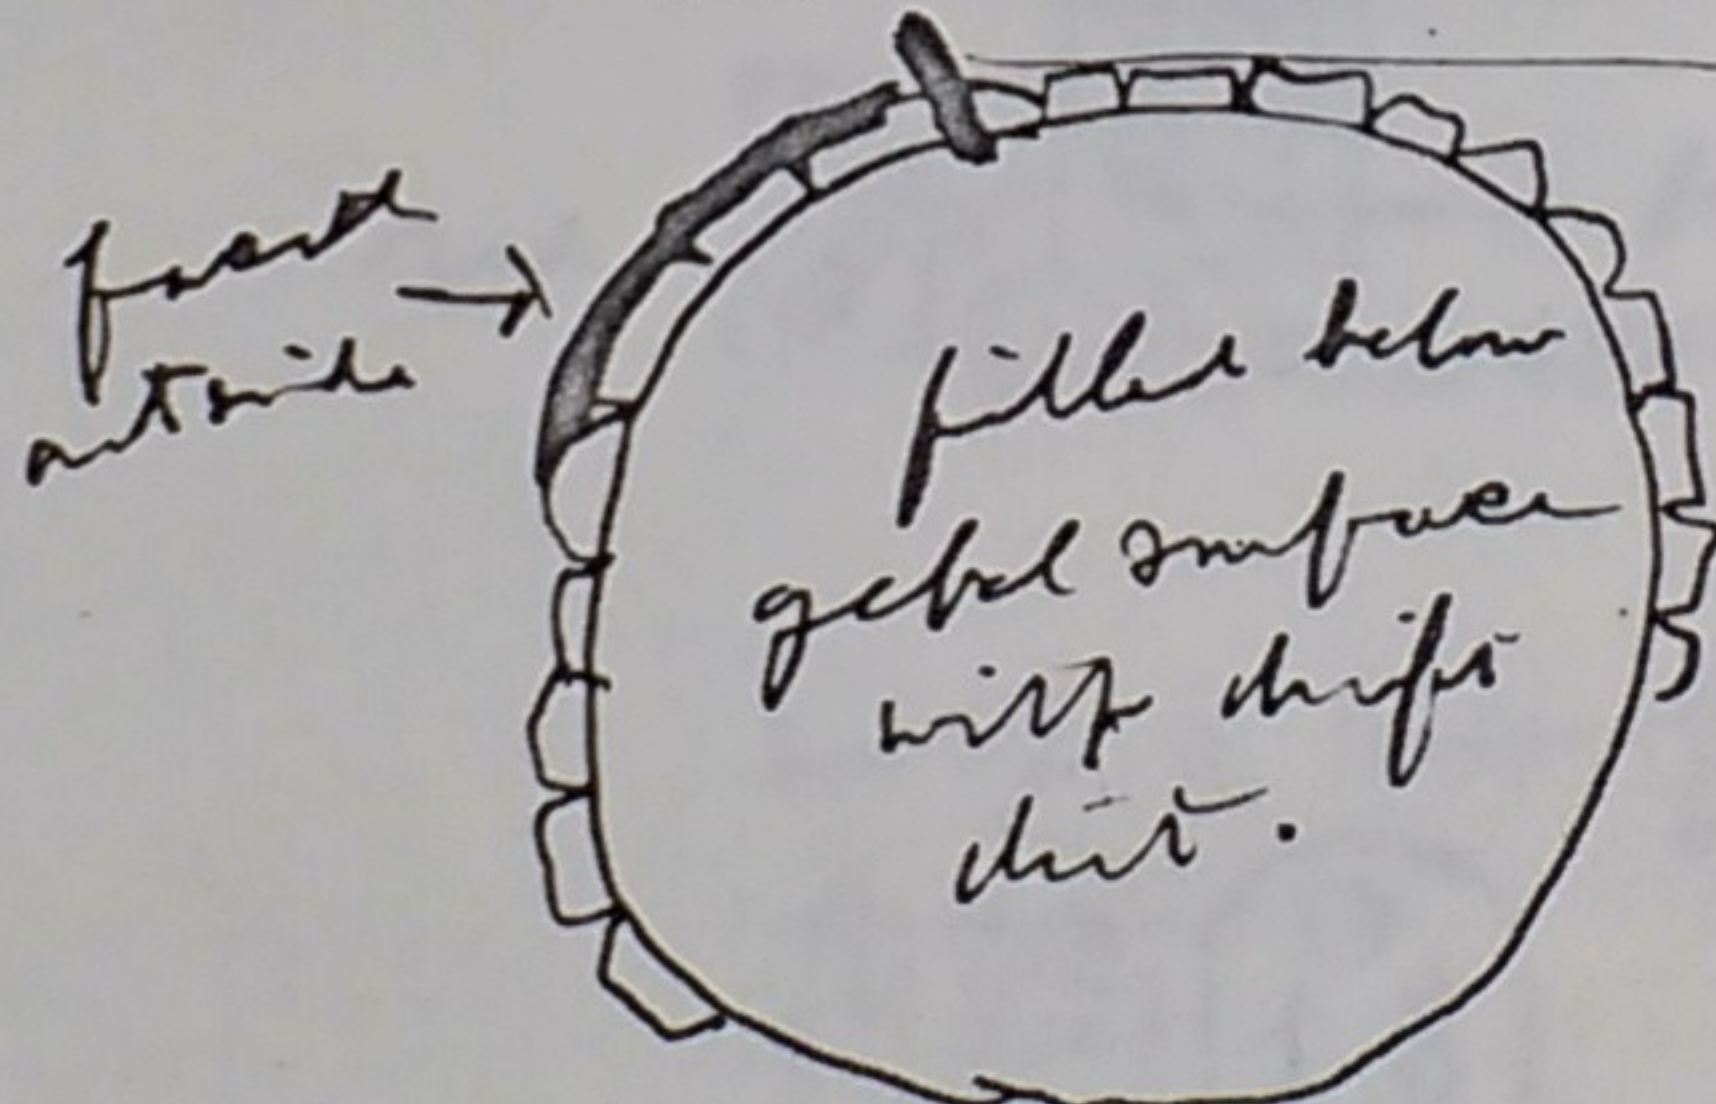

(143)
242

- ② At 900, finished cleaning out debris
in 901. Examining corners in 902, 903.
Cleaning U-side of 904, 905, 906.

Here we have an apparent continuation
of the "pitted coarse bank of debris" but
underneath the earth ~~is~~ is no longer
drift dust but a black disturbed
earth ^{containing a number of} ~~filled with~~ tumbled stones.

- ③ At 1000, reached the R. side of the
circular wall

lintel of black granite
thrown down (cut from
some large monument
but not inscribed).

- ④ Examining the walls of 500 on the back
for foundation deposits.

Cleaning rooms 509, 510, 511 to clear
up the relation between the ~~heavy~~ ^{heavy}
red-stone wall and the fine wall
of equal sized stones laid in cement.
This fine wall it was prepared to
