

(March 28)
(56)

(6) Nuri. Work on I & V.

Wednesday
March 29
57th day

Work on (1) 700 (2) 600 (3) 900-800 (4) 500 G (5) Nuri

(1) At 700, clearing G D and G U corners on gebel side. The back wall of the U. side is bent over by fall of cliff but appears to have been originally stepped.

[DRAWING]

old wall bent by fall

Also examined RD corner of pylon but found no trace of any foundation deposit.

(2) No work in 600 except as affected by work on 700 GU corner, because road must be kept open through 600 for carriers from 700.

(3) Work on 900 and 800.

The building called 900 —→ runs R alongside (U side) of 800; the additional building on the D. side of the G. end of 900 actually belongs to 800—Both 800 and 900 are over older buildings and
