141

~~143~~

- ② Clearing room A of chambers of Pyl. II.
- ③ Clearing stair & chapel of III
- ④ Clearing stair of IV (Budge)
- ⑤ Cleared stair of VII and entered doorway. (Plumb line hole as usual).
- ⑥ Still clearing stair of VIII.
- ⑦ Continued work in trenches c' and d' west of Building 200. Trench c' proceeds eastward along the top of the red sand noted in a-d. Appears to be partly wash, partly dump. The wall in trench d' is developing ~~west~~; begins to look like a regular wall (or a section fallen in tact). The angle precludes its being a part of Bldg 700.
- ⑧ Clearing Trench A, Bldg 200, reached the E end of the Pylon  (as in Bailliant).
Clearing also → SE (SE of statue hole), came on a burial vault of usual Egypto-Nubian-Libyan form.
