4th day

Work on (1) X (2) XX (3) XI (4) XIII (5) XIV (6) XV (7) Temple aa. Locals, 97.

- (1) Excavating stairway of X. Very hard packed debris.
- (2) Yesterday, I noticed a patch of scattered stones between IX, X and XI and ordered it examined. The examination

[DRAWING]

showed that only the merest traces of the pyramid were left on the surface; but just south of the patch, the stairway entrance was found filled with hardpacked debris. This was cleared down to a chamber, which was filled with two separate layers of debris.

[DRAWING]

The lower layer had stones on the surface; the upper layer was finely laminated (rain or wind). Both were water packed and extremely hard. Near the door, frags of bowl stands of fine red ware, red polished [DRAWING]
