Also a frag
of blue stone,
inscribed:

Thothmes IV (?)
or an Antefism
king of same
name ??

some nodules (manganese?) such as are

found in sandstone, etc. These were
all in loose debris. As no ~~the~~
walls were appearing in a' and b', cl
called over the two Egyptians from a' and
b' and put them in to help Mr. Harib
clear the hall in d'. The wall seems to
continue $\nearrow$ NW about 2-3 m.; but cl
doubt whether it ~~is of any~~ belongs to
any building. As c' is near d',
continued work there trenching in to E.

(8)

Worked westward towards Pylon in
Trench A. Goes slowly as the mass
of fallen stones ~~has~~ is very hard packed
and the "carry" is very long.

possible wall
~~at present~~ wide wall at present unexplained.
below level of upper floor
