Work on (1) IX, (2) X, (3) XI,
(4) XXI, (5) Temple 100.

(1)

Work continued looking for entrance stair of IX without success. Clearing sand to S of

S face ca 10-15 m. out (Corresponding to location of stair to X).

(2)

Entrance found S. of S face of X. The N end of stair shaft is ca 10 meters S of the pyg. face. Cleared down about three meters at N end; length of stair not yet clear. The filling a hard grey sandstone debris, tightly packed (unplundered?).

(3)

Work continued on stair of XI. The steps being cleared to within about 4 m. of the deep end, in hard debris. Also work on SW corner of pyg., exposing the corner with core(?) facing in place. Working east along S face of Pyramid to W corner of chapel.
