

(Feb. 23)

(27)

- (2) Clearing room A of chambers of Pyr. II.
 - (3) Clearing stair & chapel of III
 - (4) Clearing stair of V (Budge)
 - (5) Cleared stair of VII and entered doorway. (Plunderers hole as usual)
 - (6) Still clearing stair of VIII.
 - (7) Continued work in trenches c' and d' west of Building 700. Trench c' proceeds eastward along the top of the red sand noted in a-d. Appears to be partly wash, partly dump. The wall in trench d' is developing; begins to look like a regular wall (or a section fallen intact). The angle precludes its being a part of Bldg 700.
 - (8) Clearing Trench A, Bldg 700, reached the E end of the pylon [DRAWING] (as in Cailliaud).
- Clearing also [ARROW] SE (SE of statue hole), came on a burial vault of usual Aegypto-Nubian-Coptic form.
