In room 503, walls appear to have
a long inscription but ordered men not to
expose it until excavation of rooms is finished.

170

- (2) Bldg 500, Trench A. Continued clearing
off layer under "upper floor". This layer
is remarkably free from pot shards—
except near the intrusions none are found.
Thus the deposit appears to be a weather
deposit.

Mail two hours late. Mr. & Mrs.
Cunneen arrived and we brought
them straight to Meow. "Times"
from Feb. 2 to 15—being the lot missed
last week and the new lot together.
Parcels again delayed at Hula.

- (3) At Tabarka Temple (Meow)
continued clearing well. Also exposed
places of foundation deposits for examination.

Sunday
March 5
37th
day

With Mr. & Mrs. Cunneen to see
excavations. Arrived at works about
9:45. Returned leaving Burkhal about
4 P.M.
