

Friday
March 17
47th day

Work on (1) Bldg 700 (2) Front of Bldg 600 (3) Bldg 900 (4) Rooms G-side of 500 A (5) Bldg 100-sub. (6) Merowe Temple.

- (1) Clearing rooms 703 and 704. In 703 the granite altar is now clear. It is cracked across from RU [??] to GD. [??] corner. It is in the axis of the temple but does not appear to rest on an even floor. Floor appears disturbed. The uneven floor is covered with a tangled mass of fallen masonry. Many inscribed blocks (very poor work), some inscribed in relief (name of Atlanersa). These were apparently reused in the wall which was knocked down (i.e. the restored wall). In room 704, more frags. of statuettes—mostly very crude, of sandstone (seated man, apt, etc). Also gold foil, large fai. cylinders, bronze objects (uraeus etc), glass, etc. These objects are like those found in pyramid.
