

(Feb. 15) of usual single chamber type and place (empty) for stela. Since [?] we [?] have [?] driven a small trench to rock through the floor of the chapel and into the pyramid. [DRAWING] In the found some potsherds and a scarab.

(4) Cleared chamber of XIX. Very small.

[DRAWING]

but has characteristic niche at back. The size of the chamber evidently led the thieves to suspect another chamber and to break the "hole" to find it. Perhaps the second lot of thieves.

(5) At the valley end of one of the low ridges south of the Pyr. group IX-XV¹⁸, observing a mass of potsherds on

¹⁸ The earlier pyramid group. This would be a ridge toward the river from these pyramids.
