

- (Feb. 15) the surface, one of the Egyptians (Ahmed Musa'id) with three helpers was set to work to clear a grave or two to determine the date, type of grave, etc. This is numbered Cem. 2000. One grave was partially cleared and seems to be a miniature copy of the underground part of the pyramids IX-XV,--small stairway leading to a chamber. Potsherds (red pol. etc., --like Gammai) and frags. of skull of child.
- (6) In front of temple of Mut, put in several small trenches to ascertain nature of substratum. Every where the same [DRAWING] layers,--ca 50 cm. sandy loose debris, and then a very hard packed natural (?) deposit of red sand (almost like rock).
- (7) At trench A. building 500. Trench enlarged considerably [arrow] N and [arrow] W. and two small trenches (a & b) cut through the floor which had been cleared.¹⁹

¹⁹ See plan and section of this expanded area in Reisner 1917, Pl. XLI.
