⑥ Work on Pyl. I and II at Nuri. (126225)
No trace of chapel walls as yet
but the foundations of the pyl.
casing has been cleared.

Thursday
March 30
58th
day.

Work on ① 700 ② 800 and 900
③ 500 & ④ Nuri

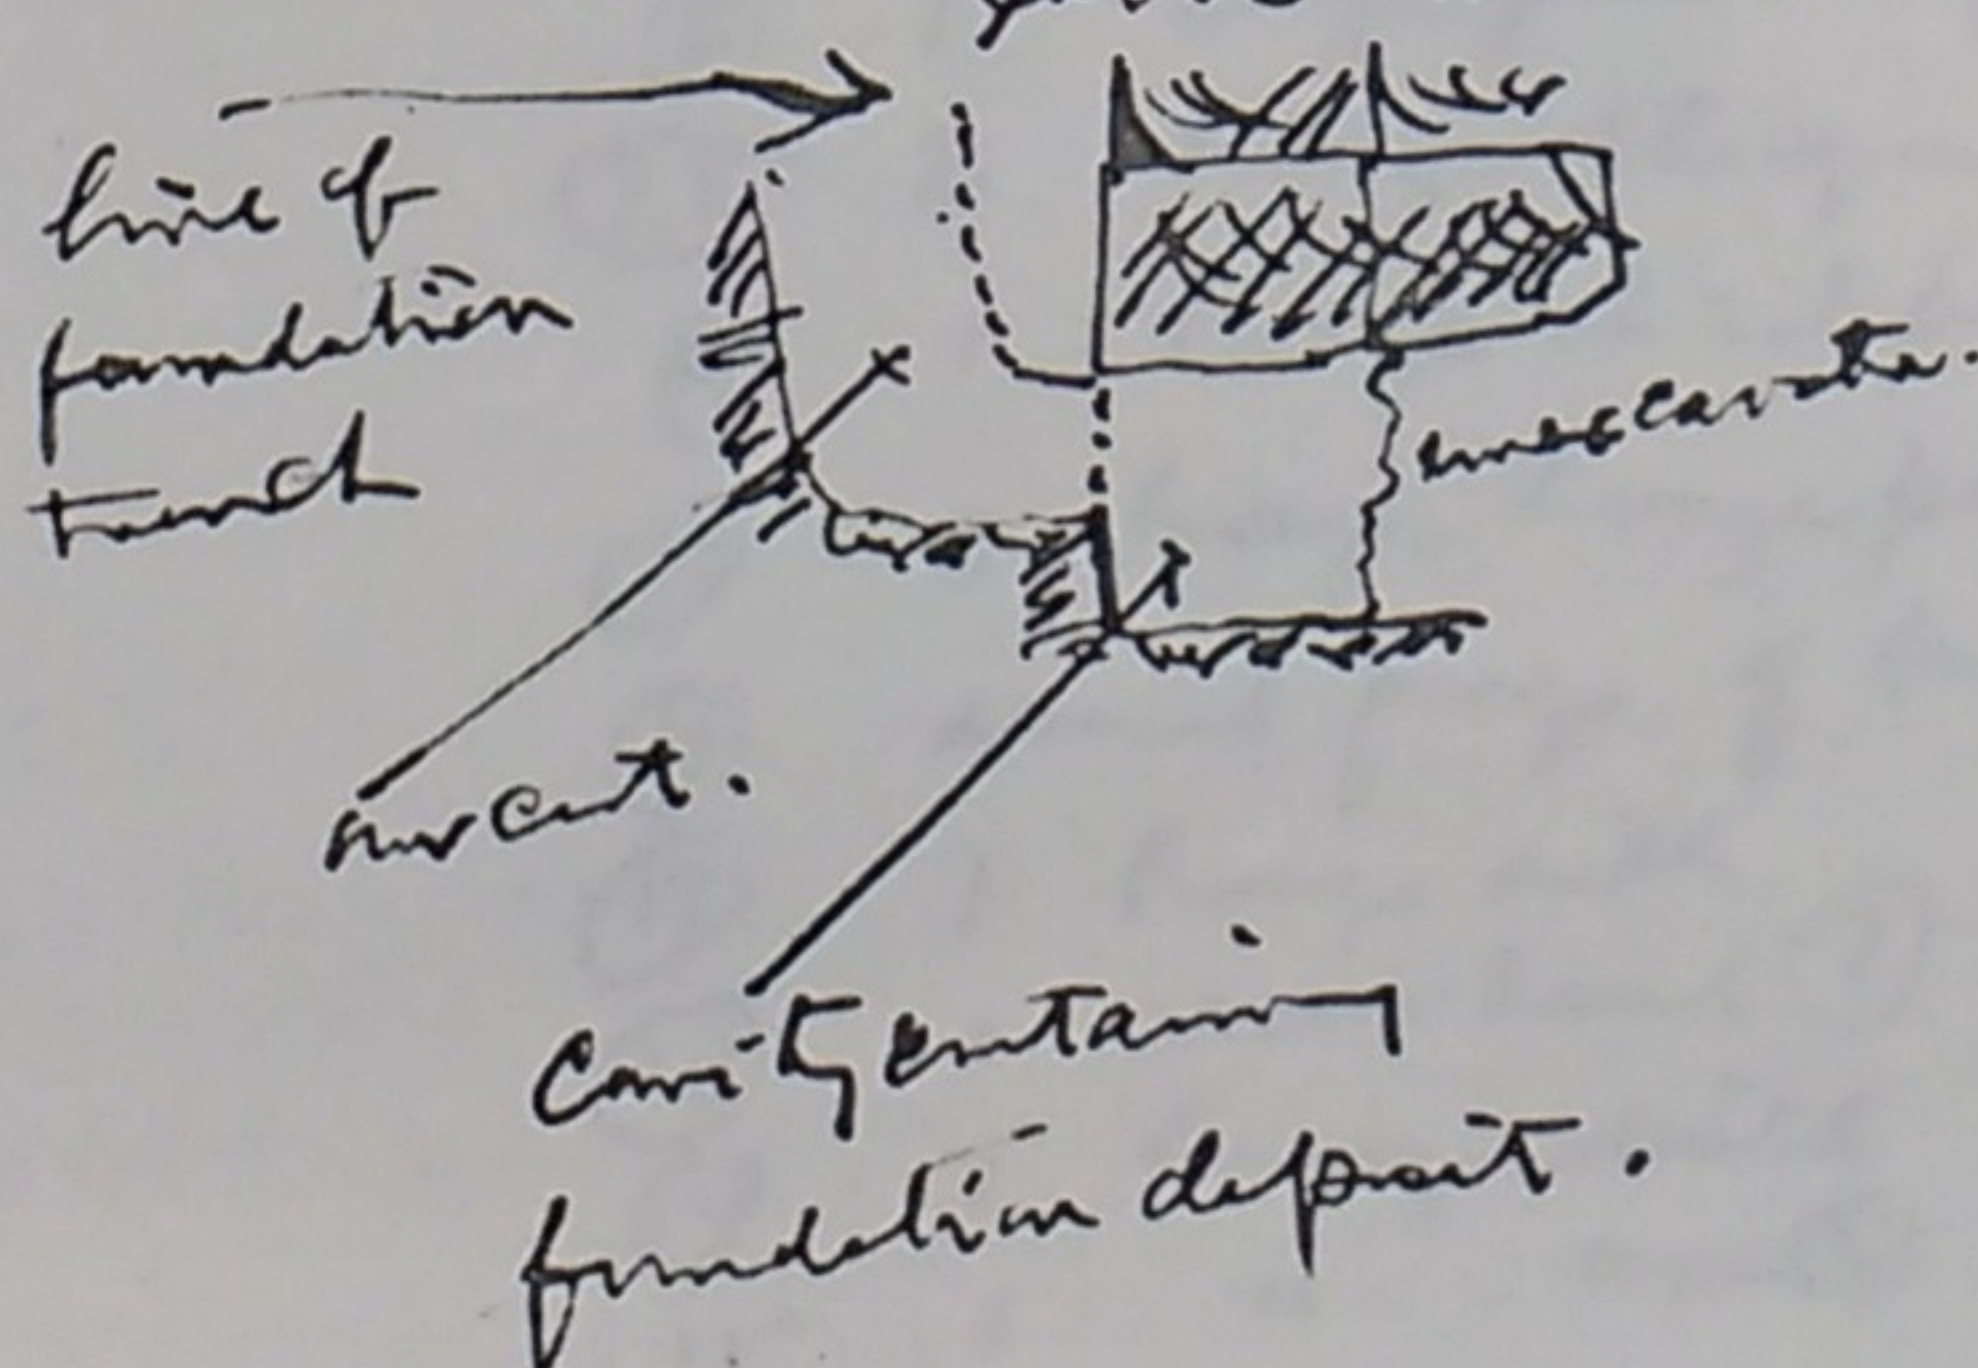

①. Clearing back of 700 (S. side)
and clearing beside Pylon on N. side.

Have carried the excavation of
the foundation trench of 700 (N. side)
on back to base of wall.

At SE corner
at bottom of
foundation trench
cut away gravel
and descended
below foundations.

Under cut corner stone of foundations
and came on a cavity filled with loose
gravel in which was found scattered a
foundation deposit
of Atlansera.

The deposit has
manifestly been
disturbed, perhaps
during the rebuilding
of the temple.
