

Tuesday
Feb. 15
20th day

Dunham and I reached work about 8:30 a.m. I worked on survey: he measured chambers of IX and X. Lunch in big tent. Started from upper works at 3 but delayed by (5) and (7) below. Reached house at 5:10.

Work on (1) Pyramid XI (2) Pyr. XII (3) Pyr. & chambers of XVIII. (4) Chamber of XIX. (5) Cem. 2000. (6) Temple of Mut (Building 300). (7) Trench A at Great Temple (Building 500).

- (1) Still clearing the W and N faces of Pyr. XI. At the N end of the W face, the enclosing wall is preserved to the height of another course. [DRAWING] Thus it is clear that this wall had actually an enclosing wall built on the retaining wall of the platform.
- (2) Clearing W and N faces of Pyr. XII.
- (3) Cleared all faces of Pyr. XVIII, core only preserved. Remains of chapel
