

(Feb. 8th)

- (6) Continued work on approach to XIX. A roughly made stair at S. end goes down ca 1 ½ m, then a nearly level rock floor extends to N end, the door (filled with laminated drift) being ca 75 cm high. 9 m in front of door in W corner a roughly circular hole descending vertically into the rock, cleared to a depth of ca 3 ½ m (continuing).

[DRAWING]

- (7) Continued clearing building 100, to west of 101-102. Immediately west of 101 an apparently blind room with rectangular mud brick pillar (foundation only), similar to those in 111. [DRAWING]

Work also on Rooms 121, 122, the plan of which is now clear.

[DRAWING]
