

started on E-W track to see if
the ground could be used for a dump.

Trench X.

- ⑥. On the east face of the N. end of the great
tangle (500) began examining the debris along
the outside of the wall. ^{Bldg. 500, Trench D.} There is a clear
restoration here.  A well-laid wall
(mortar) of small stones of uniform size, is
built off a roughly built wall of larger stones
(dry-laid?). (later note:- wall of larger stones built
against wall of small stones).
