

- (1) B 501 The excavation reached the "N" wall in 501 sect.
Feb. 3. 17

[Drawing]

The floor of the late red-brick structure was not traceable. The older wall underneath rather contradicts the theory that the temple ended at Pylon II in the Ethiopian period.

- (2) B 502 Examining sub floor deposits in 502 II-III, 5-7.
Feb. 3.

[Drawing]

Aside from the middle aisle, I have found no trace of pavements I and II. Pavement III appears only in 503 perhaps merely a repair of pavement II.
