3. is a fine headless stuetto. ¹⁹⁰ 92
On belt, two cartouches: the
left one : the right one erased.
Thus the stuetto is apparently reused.
Cleaning room 203. Reused blocks
in the wall. It appears as if the
entrance by Senekhem was a Atlanassa
room, was destroyed by a fall of
stone and rebuilt considerably later
only to be dried by a second fall of
stone. The stuettoes etc in 204
were set there long after the time of
Atlanassa. The sandstone statue
(wrecked) looks about same age
as Bentel pyramids.

② Cleaning 900. Reused stones
