

(March 31)
(59th)

(2)

Continued work on the group of building marked 800 and 900.

In 800 we have now cleared past the test trench (x) pit in to reveal depth of debris (see p. G.B. II 62). We are approaching the granite obelisk of Atlanersa which protrudes from the sebah rubbish, but is perhaps a little to one side of 800
