

(March 12)

(43) back wall crushed by fall of cliff. Space contains much black dirt.

[DRAWING]

This sudden ending, lessens greatly the task of clearing the temple.

(2) Clearing floor of Bldg 600, adjacent in the N. The room in which we are working is beside the back part of 700. The floor is at least 2 meters higher than the floor of 700. Again the work in sight becomes lessened.

(3) The street ends under a later cross wall and could not be picked up beyond it.

[DRAWING]
