## 1920

<ul> <li>26th Day of work:</li> <li>(1) Work continued "S" of 502. In area B 502 EX 1 at the extreme "E" end of area work around edges of rectangular pit cleared last season. The "gebel" appears to slope down from "W" to pit edge, as it was not found at edge of pit on level of surrounding gebel. In 502 EX 2 and in front of door into 502 "gebel" continues unbroken and about level. In front of door observed squared white blocks at about 15cm above gebel, perhaps steps leading up to door at higher lead.</li> <li>(2) In area B 502 EX 4 continued clearing "west" of foundations of B 500 sub 10 noted day before yesterday, more Meroitic (mixed stone, brick + mud) walls on high levels, just under present surface. Immediately beneath center of the "NS" wall running just "E" of 500 sub 10 (cf. sketch Jan 5th), and apparently immediately under surface on which wall was built, found large fragment of seated or squatting (?) statuette in black granite, about ½ life size.<sup>3</sup> Head, torso, and waist, but face missing; so far as could be observed, uninscribed. It</li> <li>20-1-1000</li> <li>is the figure of an old man, with deep folds in the abdomen. The wig is thus [Drawing], but it is not the figure of a woman. Left in position for photography or receipt of plates.</li> <li>(3) In area B 900 EX 2 in clearing lower levels and broken places in the floor, just above "gebel", came on following two fragments</li> </ul>	Jan 7th Wednesday	80 locals.
The "gebel" appears to slope down from "W" to pit edge, as it was not found at edge of pit on level of surrounding gebel. In 502 EX 2 and in front of door into 502 "gebel" continues unbroken and about level. In front of door observed squared white blocks at about 15cm above gebel, perhaps steps leading up to door at higher lead. (2) In area B 502 EX 4 continued clearing "west" of foundations of B 500 sub 10 noted day before yesterday, more Meroitic (mixed stone, brick + mud) walls on high levels, just under present surface. Immediately beneath center of the "NS" wall running just "E" of 500 sub 10 (cf. sketch Jan 5th), and apparently immediately under surface on which wall was built, found large fragment of seated or squatting (?) statuette in black granite, about ½ life size. <sup>3</sup> Head, torso, and waist, but face missing; so far as could be observed, uninscribed. It20-1-1000is the figure of an old man, with deep folds in the abdomen. The wig C 7095C 7095is thus [Drawing], but it is not the figure of a woman. Left in position for photography or receipt of plates. (3) In area B 900 EX 2 in clearing lower levels and broken places	26th Day of work:	(1) Work continued "S" of 502. In area B 502 EX 1 at the extreme "E"
at edge of pit on level of surrounding gebel. In 502 EX 2 and in front of door into 502 "gebel" continues unbroken and about level. In front of door observed squared white blocks at about 15cm above gebel, perhaps steps leading up to door at higher lead. (2) In area B 502 EX 4 continued clearing "west" of foundations of B 500 sub 10 noted day before yesterday, more Meroitic (mixed stone, brick + mud) walls on high levels, just under present surface. Immediately beneath center of the "NS" wall running just "E" of 500 sub 10 (cf. sketch Jan 5th), and apparently immediately under surface on which wall was built, found large fragment of seated or squatting (?) statuette in black granite, about ½ life size. <sup>3</sup> Head, torso, and waist, but face missing; so far as could be observed, uninscribed. It 20-1-1000 is the figure of an old man, with deep folds in the abdomen. The wig C 7095 is thus [Drawing], but it is not the figure of a woman. Left in position for photography or receipt of plates. (3) In area B 900 EX 2 in clearing lower levels and broken places		end of area work around edges of rectangular pit cleared last season.
front of door into 502 "gebel" continues unbroken and about level. In front of door observed squared white blocks at about 15cm above gebel, perhaps steps leading up to door at higher lead. in the floor, just above "gebel", came on following two fragments		(3) In area B 900 EX 2 in clearing lower levels and broken places
		in the floor, just above "gebel", came on following two fragments
at end of work today: - 1st frag. upper part of small obelisk granite with		at end of work today: - 1st frag. upper part of small obelisk granite with
part of [Drawing] top and traces of the 4 faces. Two have legible		
[Drawing: Hieroglyphs] frags. of inscription as A + B opposite (rough copies).	[Drawing: Hieroglyphs]	
2nd frag. of seated statuette with apron [Drawing], over thigh, part		
of lap, and upper part left side of chair (black granite), inscribed		
thus The name [Drawing: Hieroglyphs] is faintly legible.		
[Drawing: Hieroglyphs] but has been clearly erased, not accidentally		
obliterated, which would indicate a date		
to the time of Akhenaten or earlier (?). Cf the statuette from		
B 704 in 1916.		
(4) At the Pyramids: finished corners of Pyr I, each with a		
small gold ring. The "SE" deposit was accidentally disturbed		
in clearing, and enables me to give more detailed description. It consists		
of a tiny piece of gold wire, bent to an almost perfect circle, but the		
ends free, suitable for putting in a pierced earlobe. D. 1.1		
Thickness of wire 0.05.		
Finished examination of Pyrs. IX and X, and found no traces of		
foundation deposits. If a further detailed examination of XI		•
shows no deposits there, I shall assume that the lower group was not provided with them.
