

March 19
49

- (5) Trench 500 F. Continued clearing room foundations.

[Marginal note]: Diaries exhausted, not replaced during [?] war

- (6) Bldg 100 sug. Descending below floor in rooms 108, 114, 105. In 133-134, 110, there is a hard red floor at about 40 cm below living floor of 108. In 108, the columns are founded on pillars of burnt brick.

[DRAWING]

In the GD quarter of 108 there are well built cemented red brick walls below the level of the foundations. The bases of the sub-walls are so low that it does not seem possible there can be any other building below them (i.e. would [?] be below high Nile level).

- (7) Working out mud-foundations of Merowe Temple.
