Barkal VIII

( (2) B 502  
Jan. 27.)

Pavement 503 IV is the same as the top pavement 502. Pavement 503 III is immediately over 503 II and both are seen in 502 section I 4 at a depth of about 100 cm under the top pavement of 502. That is neither could ever have been in use with the cols. of the old plan (Piankhy). It is clear that the First Temple extended under the "Piankhy" temple" → "W". But I have not yet picked up traces of the walls of the First Temple.

In doorway from  
502 to 501.

[Drawing]

(3) B 503      Examining pavements. Recording same.  
Jan. 27.

(4) B 502 EX "S" Trench work continued.  
Jan 27

(5) B 503 EX "N" Continued excavation of "drain"  
Jan 27

[Drawing]

It is  
now clear  
that this  
is an  
excavation

slope-way made to excavate the great  
well B 1000 and afterwards filled up.

(6) B 1200      Excavation of superficial debris continued.  
Jan. 27.

(7) Kurru      Found in front of Kurru XV another fragment  
Jan. 27.      of a Piankhy shawwabt, inscribed

[Drawing]

I sent Said over who reports that the  
supposed pyramid near the village is only  
scattered stones on gebel.  
Started work on Pyr. K. XV and K. VIII.
