Day of rest at Barkal.

Yesterday was an unusually hot day and closed very murky in west. Today the heat extreme and the wind mostly from the "W" or "N". About sunset a heavy sandstorm came up from the "S". Mr. Bond, who was collecting trader's tax at Kareima, living in his steamer, "Venture," came to dinner. With the coffee, the storm was at its worst. Mr. Kemp's tent went down, with all his things higglety.
