③

In front of 600, a great (120

600

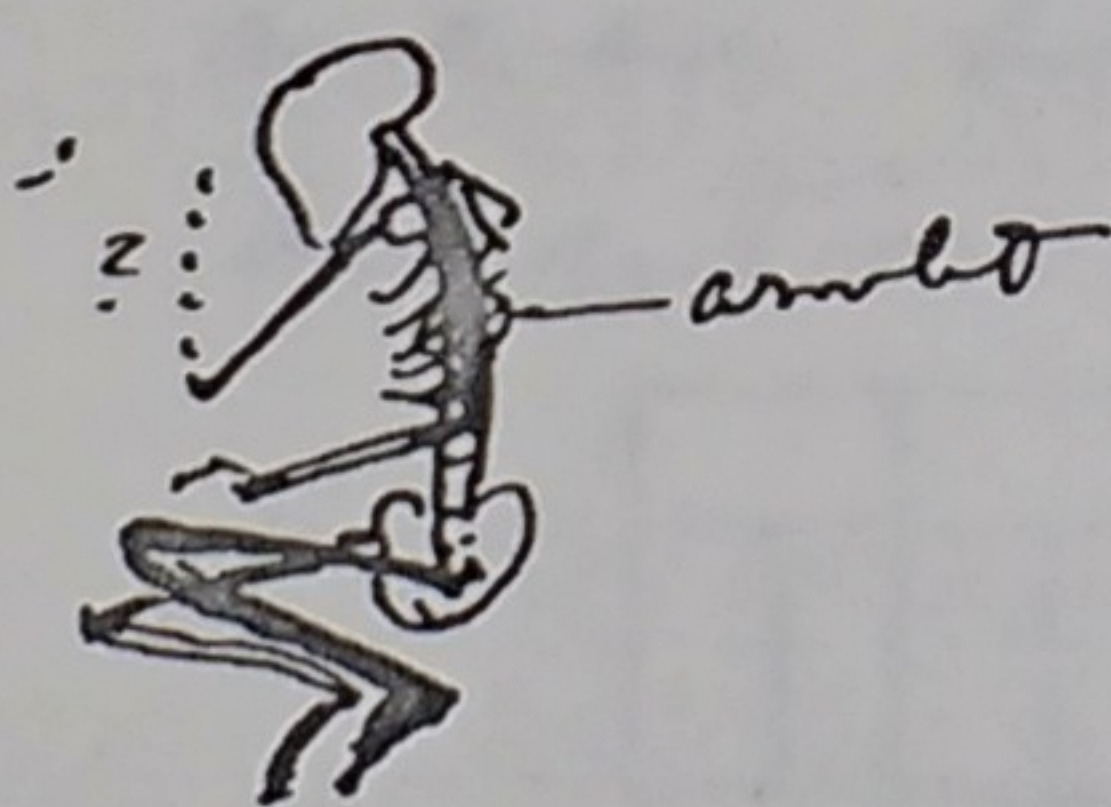

♀ 601

219
irregular hole
of recent
origin

On the R. side
of this, a
second burial
on right side
head W (local)

This second burial (602) has a stone
armlet (C-group type). Thus the
evidence shows that these burials
are M.E. to N.E. (any 1500-1900 B.C.)

↑ W. owing to the change
in direction of the
river, ↑ W is the
same as ↑ at
Kerma and in lower
Nubia.

W. from this and in front of
701 is an extensive pavement of
red stones about on a level or a
little under the level of the floor of 701.

④

Resumed work on the complex of
walls of buildings of different date
hitherto called 900. The debris has
been so turned over by settlement and
