34) ③

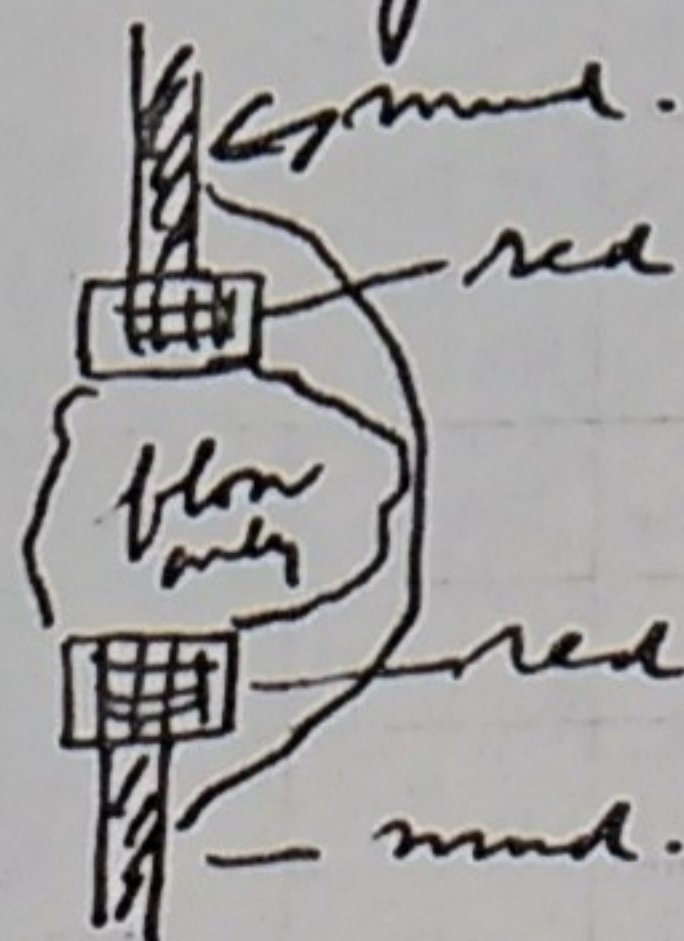

Bldg 500, Trench A. Clearing away ¹⁶³ the "upper floor" and the floor N of it to a level of white stuff visible in the cuts. This is I think a surface of decay (like the 20cm layer on the "upper floor" near the pylons). Near the mud wall on the N. came on an intrusive hole which proved to be a burial. I think it was a

In. 504

what appeared to be an intrusion was due to fall of roof.

Also cleared gateway in mud brick wall on north

④

Col Jackson having called my attention to the fact that the well in the first court of the Taharka Temple at Inerose had not been excavated to the bottom, I put 3 Egyptians and 10 locals to work to clear it. Today carried out drift sand of 3 years accumulation.
