Wednesday
March 29
57th day

Work in ① 200 ② 600 ③ 900-800
④ 500 & ⑤ Nuri

① At 700, clearing G/L and G/H corners on yel side. The back wall on the W. side is bent over by fall of cliff but appears to have been originally stepped

restoration
inside.

all wall bent by fall

Also examined R/L corner of pyramid but found no trace of any foundation deposits.

② No work in 600 except as affected by work on 200 G/H corner, because road must be kept open through 600 for carriers from 200.

③ Work on 900 and 800.

The building called 900 runs E-R alongside (W side) of 800; the additional building on the W. side of the E. end of 900 actually belongs to 800. Both 800 and 900 are over older buildings and
