

Monday
April 10

Day of rest for men. (158)
Lumham to Borkel to work
on object register. I started for
Nari with find but had to
stop at the G. L. R. shops for
repairs. The screw was loose
and the shaft packing was leaking.
Finally reached Nari there at 12:30
Pp. at 1.

We removed the bronze basin
with out difficulty but found the
semita stuck to the ground, ~~and~~
As it is very fragile, and already
broken in a number of pieces,
we had to leave it until tomorrow

Tuesday
April 11
68th day.

Work on (1) 800 Pylon (2) 1000
(3) 506-520. (4) Nari.

- (1) Cleaning top and front of First
Pylon of 800.
- (2) Continued work on 1000. Fining
of the glaze with dec. gold band.
- (3) Cleaning rooms 506-520 as
yesterday
