Barkal VIII

(3) B 502 EX "S" Continued trench along "W" side of rectangular
Feb. 3 pit (mud-pit) working "N". No change.

(4) B 502 EX "N" Continued trench along "N" side of B 502 up
Feb. 3 to supposed exit door. Doorway not yet
quite clear. This trench is five or six meters
wide. The debris is mostly broken stones
and dust. A few fragments of hard
stone were found. The debris appears to have
been turned over and over. All ancient floors
even surfaces of decay are destroyed right down
to surface of red gravel stratum and
this red gravel surface is scarred with
pits and holes. At one place a
frag. of mud brick wall may be the
remains of the enclosing wall as found
on the "S".

(5) B 1200 Working 1234 and 1235. In 1234
Feb. 3 reached Anlaman floor. In 1235 reached
next later floor.
