- ① Clearing room 703 and 704. In 703
the granite altar is now clear. It is
cracked across from NW to SE corner.
It is in the axis of the temple but does
not appear to rest on an even floor.
Floor appears disturbed. The uneven
floor is covered with a tangle mass
of fallen masonry. Many inscribed
blocks ~~and~~, some inscribed in relief
(name of Attanerra). These were
apparently reused in the wall which
was knocked down (i.e. the restored
wall). In room 704, more frags.
of statuettes - mostly very crude, of
sandstone (several men, ape, etc).
Also gold foil, large ^{fair} cylinders, bronze
objects (vases etc), glass, etc. These
objects are like those found in pyramids

very poor
works.
