

Minot 31 of rubbish as would happen at ¹³³232
a great clearing previous to the restoration
of the temple.

- (3) Clearing space in front of 600.
The circular wall which seemed to
be a well proved not to be a well

The drift dirt was penetrated at one
point by a small, ^{vertical} hole but otherwise
lay undisturbed under the late wall on
the surface. The surface wall cannot
be connected at present with any building.
Owing to the general denudation by
erosion, the wall is on a knoll high
in the air above all adjacent walls.

- (4) Work on pp. I, II and VIII at Nuri.
Work on ① 700 ^{③ 600} from ③ 600 to ③ 700-900.

Saturday
April 1
60th.
dry

(5) Nuri.

- ① Clearing back of 700 on E. side. ✓
② Examined S.E. corner of 600 but found
no foundation deposit.

Examined S.W. corner of 700 sub 1 but found
no foundation deposit. Two undatable pits.
