

(Apr 218)  
(74)

further excavation until next (124)  
winter. The job will require several  
weeks. However we cleared room  
A to the floor.

On the floor  $x^1$ , four alabaster  
jars  perhaps originally standing in  
SW corner (NE).  $x^2$  a number of cylindrical  
objects (ornaments) of gilt silver(?), badly  
crushed by rock. (Probably dropped here  
by thieves).  $x^3$  in the NW corner (NW)  
8-10 alabaster jars, some whole, some  
crushed, which appear to have stood originally  
against the wall.
