

(Feb. 27)
(31)

(4) Building 500 Trench D.

[DRAWING]

We are only clearing the outside of the wall at present. The only fact of interest is that the walls are founded on sandstone and are only ca. 50 cm high.

(5) Bldg 500, Trench A. Still clearing front of pylon (where the work is very slow on account of packed mass of fallen stones) and debris above floor along wall N of Pylon. Enlarged the hole in which the statues lie by breaking out about 1 meter of "upper floor" in the SW. The Taharka statue is headless (as expected). the grey granite statue is inscribed but it
