

(April 5)

(63) buildings 800 and 800 sub has been found.

[DRAWING: section]

(2) At 900, finished clearing out debris in 901. Examining corners in 902, 903. Clearing U-side of 904, 905, 906.

Here we have an apparent cut in section [?] of the "pebble covered bank of debris" but underneath the earth is no longer drift dust but a black disturbed earth containing a number of tumbled stones.

(3) At 1000, reached the R side of the circular wall.

[DRAWING]

--faced outside

--filled below gebel surface with drift sand

--intel of black granite thrown down (cut from same large monument but not inscribed)

(4) Examining the walls of 500 on the back for foundation deposits.

Clearing rooms 509, 510, 511 to clear up the relation between the heavy red-stone wall and the fine wall of equal sized stones laid in cement. This fine wall I was prepared to
