

(Feb. 15)

[DRAWING]

Small trench (b) showed the floor with a thin white layer under a thin mud layer then wet dirty sand and at 80 to 100 cm down another mud floor.

At small trench (a) there was already a break in the floor. The trench was sent across this break and came on a over life size black granite figure (standing, left food forward, hands at side). Hand, left shoulder and arm are broken off. Down the back, a line of incised hieroglyphics: (as over). Underneath statue 1 and nearly a[t] right angles lies a second similar statue (2).
