

(Kurru XVII
Feb. 17)

Tuesday, Feb. 18
49th day of work

Locals, -- Barkal, -- } Total
Kurru, -- }

Work on (1) B 502 Day of rest for
 (2) B 1200 Kurru locals.
 (3) Kurru XVI
 (4) Kurru XVII

(1) B 502 Continued in 502. Sect. VIII 1 finished;
Feb. 18 IX 1, nearly done; some work done in VI-VII 2.

(2) B 1200 There appears, from the examination of
Feb. 18 the sub-floor deposits in 1230, 1246, 1245
 1239, 1238, 1236, to have been one
 building earlier than Anlaman-Aspalta
 structure (or structures). The crude brick
 of the earlier walls are formless, (i.e. either
 coalesced by pressure on galûs). The
 a-a bricks have a large amount of
 dark sand in the mixture.
 There are at least two main structures
 after the ruin of the a-a structure (or structures)
 but there are a number of other walls
 which may or may not be repairs of
 the main late structures.
 Wall III (the second in date) of 1201-1205
 belongs to the A-A structure.
