

(April 20)
75

Cups. At + was a
bronze cup on the debris.

(179) / 279

At ④ a bronze Osiris figure and
a bronze bowl on the debris.

Rooms A and B were full of
drift sand to top of doors. In C
the drift slope back from top of
door to above mastaba. Roof
in B fell anciently: roof in
C fell ~~off~~ after we opened the
place and before we excavated it.

- ⑥ Khunlun and I removed the objects
in VII A at Meri. During the
morning, men were clearing Rps. VII
and XVI. In the afternoon they worked filling
VIII A with dry sand (from the
sand dune on R. side of VII and VIII).
This will prevent any fall of wall
or other damage to the room
below.
