

[GE note: back to original handwriting]

Thursday

Feb. 3

10<sup>th</sup> day

Work on (1) IX, (2), X, (3) XI, (4) XXI, (5) Temple 100

- (1) Searching for entrance to IX further south.  
[DRAWING]

N.G. On the rock there is about 50-80 cm of water packed detritus, not differing in color or consistency from the original filling of the stairways. It is therefore necessary to trench along the surface of the rock itself to find the stairway.

- (2) The distance of the stairway of X from the pyramid is noteworthy (ca. 10 meters). The stair has high  
[DRAWING]  
well-cut steps. There is no plunderers hole yet visible. The debris is not laid down in layers but is the original filling. In the filling, a small bronze cup [DRAWING] and two pieces of bronze and two frags coarse cloth.
