

The debris on the statue is

19

present level
20 cm recent drift
20 cm harder drift

Hand-drawn geological cross-section of a beach profile. The diagram shows a beach with a dune on the left and a flat area on the right. A vertical line marks the transition. To the left of the line, the beach is labeled "20 cm" and "lower floor". To the right, the dune is labeled "20 cm harder drift" and "90 cm of sand & dirt some stones". Below the dune, a shaded area is labeled "30 cm" and "wet dirty sand". The top of the dune is labeled "upper floor".

From top of stratum ① to present surface is about 185 cm.

Feb. 16
21 to day

I worked on Survey. Runham as
measuring chambers of IX and XX.
Lunch at Bartol-tent.

Work on ① Pp. XI ② Pp. IV ③ Pp. VI ④ Pp. VII ⑤ Pp. VIII ⑥ Building 500 trench A. ⑦ Building 500 trench B. ⑧ Cum. 2000.

- ①. Clearing N face and W face of LD.
- ②. Formed and began clearing stair to TV
- ③. " " " " " " LD
- ④. " " " " " " LD
- ⑤. " " " " " " LD

N.B. The stairs to these four pygs. were found immediately (inside an hour) ^{opposite} ~~to~~ the middle of the south (river) face of the pyramid.
