

- Jan 5th (cont) 15 cm. diam. frags ordinary fai shawabtis, and rim of a small fai bowl and of model pointed bot. jar [Drawing], all in wh. bodied fai. 2 bronze nails, a long wh. fai cyl. bead, and a few scraps gold foil.
- (2) Work continued on areas "N" of B 502. In B 502 EX 4, while examining levels below floor, came on foundations of a building, at about 1 meter below sill of door in N wall of 502. The masonry is chiefly wh. sandstone, though I observed one or two blocks of red. Orientation slightly different now that of 500. Sketch shows what has been cleared today. I am designating this building B 500 Sub 10 provisionally.

 25th Day of work: --
- (1) Work continued below floor level in B 502 EX 2 as yesterday.
 (2) Work continued in area 900 EX 2 removing high bank. on which end of R.R. rested before moving back. Little linear progress made, but the bank was nearly entirely removed. In debris here, hind quarters of small black granite sphinx. sitting on, and completing one of the 2 figures found Dec 19th (cf. entry above). Also small frag of wig of small statuette in dark brown close grained stone, the design thus: --
 The gran. pedestal found Jan 3rd was photographed with one of our 3 remaining plates to permit of its removal.
- (3) At Upper Pyramids finished following corners: --
 Pyr II "SE" + Pyr I "NE" each containing one gold ring. Pyr III was completed Jan 4th (with 4 rings) and Pyr IV yesterday (4 rings). Today started on corner of small pyrs. IX and X.
