the second pyram, are tracers of the (182  
street and an inscribable basin 251  
like stone.

all this is in debris below the foundation of the later temple 900. The headress piece may fit in the Esphat head from 800A.

- ③ On the E. side of 800 and 900, cleared off all debris down to red gravel. No walls or indications of walls.
- ④ At 1000, continued clearing in and around the "great well". The interior diameter is about 10 meters. The red gravel gravel rises on the R. side to the top of the wall.
- ⑤ In 800, continued clearing 509-511. In 800, flag of a disturb  $\Delta = \text{circle with cross}$
