

(Feb. 13)

(8)

At B. clearing well, now a meter or more below water level. We intend to use the well for water for washing and photo. purposes.

Monday

Feb. 14

Day of rest for men.

Mail day. Diary to Drummand and copy to Pyr. Camp.

Cleared outer [??] magazines here. One white tent ruined by white ants, another damaged. Jams all dried up. Probably usable but Mrs. R. has ordered them thrown away. We have found more of the stores good,--except possibly the flour.

Early this morning rides [??] out over Griffith's excavations here. Saw the places where the Governor has worked. The "market place" looks very late in date. [DRAWING] See especially the groups of columns.
