

(Jan 27)

③ (see below) 1916

- ④ Found stairway entrance to XIII
⑤ " " " XIV
⑥ Continued clearing stairway entrance to XV

63
63

All three are of the same type.

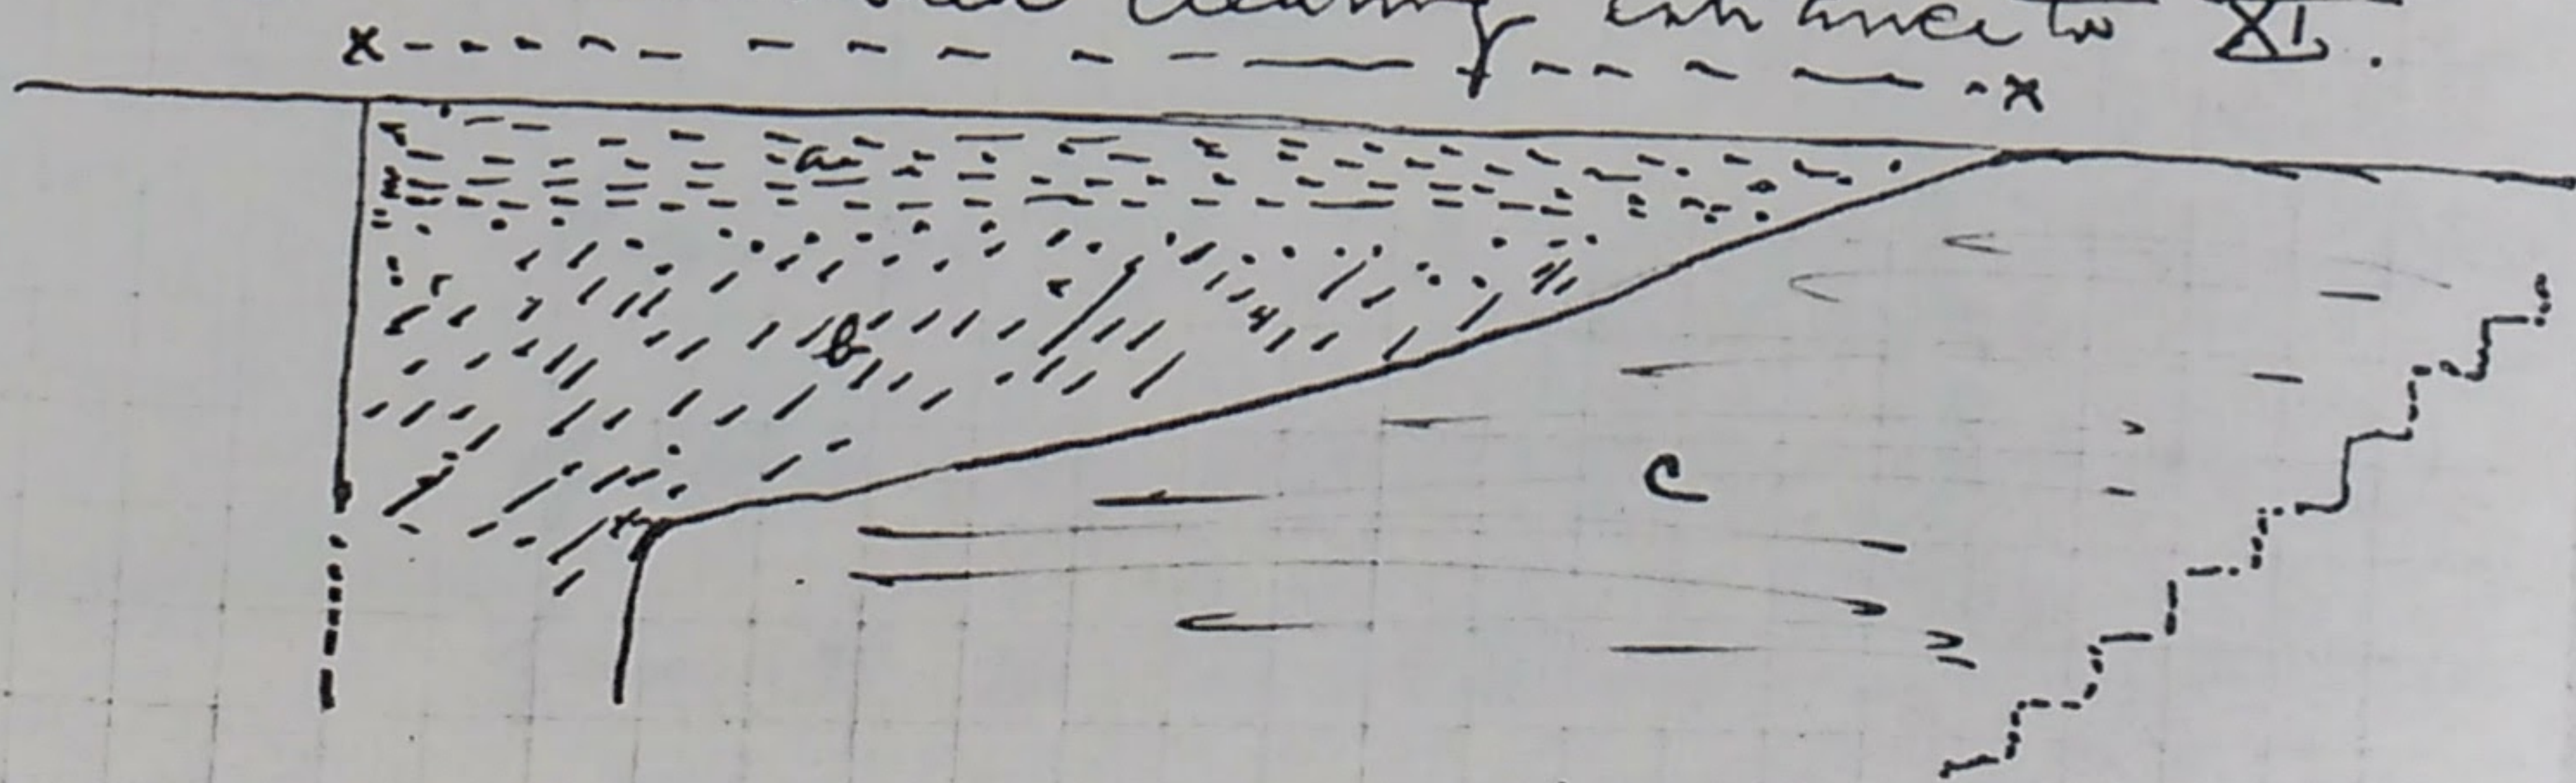

angle of
stairs about
40° to 35°.

plunderer's hole in original
filling, now filled with reddish
yellow drift sand, hard packed.

originally filling of stairway of grey
sand, probably ~~is~~ debris from the
excavation of stair and chamber dumped
back. It is now almost as hard as the
original sandstone. Borrowed five picks
of Mr. Warden to break it up.

- ③ Continued clearing entrance to XI.

The entrance is much larger than appeared
yesterday, which was x---x. This part with
the drift sand filling a (hard) b (firm)
described yesterday, is only the plunderer's
