

(Feb. 5)

- (3) Clearing SE corner and East face of XI.
[DRAWING]

The greater part of the N. gangs were on this clearing. The casing has been destroyed at the SE as at the N.W corner, but appears again further N along the E face. The core wall is well built in distinct steps which took the casing courses. In the E wall of the platform wall (S. production) was a burial (apparently Moslem?).

- (4) Clearing chambers of XII.

- (5) In the clearing of XI, revealed the W face of a small Pyr. XXIV see under (3).
