

(April 1)
(60)

on the other side of the river they preserve the orientation of the Barkal pyramids. My hopes of finding in the Nuri pyramids the tombs of Taharqa, Eschamut, Attemansa etc., seem unlikely of fulfillment. (186

The mail came in a little late bringing "Times" of March 2 to 15.

Gayette of working ending Sunday March 27.

A company of camel corps under English and two Egyptian officers arrived. ~~There~~

This is a preparation against any action on the part of the Senussi or Ali Shinar. I hear that more troops are coming.

Sunday

April 2

61st
day
of
work.

Work on ① 700 ② 600 ③ front of 600 ④ 800 ⑤ 900 ⑥ Nuri.

① At 700, examined R.E. corner of pyramid in rain for foundation deposit.

At S.E. corner found niche containing foundation deposit. This niche was filled with packed sandy dirt - packed by rain water. The object was identical in the earth as at the S.W. corner.

After clearing about $\frac{1}{8}$, the props had to be put in under the corner stone, causing an interruption of the clearing.
