

(Feb. 24)
(28)

(4) Clearing stair of V (Budge). There is about 1 m. bet. end of stair and Budge's hole!

(5) Clearing Room B in Pyr. VII

(6) Still in stair of VIII

(7) In trench d' (Bldg 700) a well defined wall is now partly clear. Its direction is 56° W of N. The direction of Blg. 700 taken on cols. and on wall running into rock varies from 41° to 43° W of N. Blg. 600 is 44° W of N. Blg. 500 varies from 56° to 53° W of N. In other words, the wall in d' seems to be older than 700, perhaps contemporaneous with 500.

Trench c' continues through debris along surface of red stratus but with no [sic?] encountering any walls.

(8) Trench A cleared whole end of pylon and a meter of wall of temple. [DRAWING]. Shaded part represents last restoration of temple. Last restoration apparently built on a decayed wall.
